To Whom This May Concern:

By law, all students are required to have a TB skin test administered to participate during the clinical portion of our CNA training program. If their first test is positive, the student must have a chest x-ray completed. Students with a previously positive tb test should only have a chest x-ray completed. A copy of the chest x-ray report (if necessary) is required for the student's file. If there are any questions, feel free to contact our office during normal business hours.

Best Regards,

Latosha L. Corley, RN/ Program Director

Student's Name: _____

Tuberculin: (purified protein derivative)

1st Step: Date Administered (MM/DD/YY):
